Claims 1-3

The invention set forth in claims 1-3 does not involve an inventive step in the light of document 1 cited in the international search report. Document 1 does not mention a "Young's modulus of 5GPa or more" and a "leakage current of $1 \times 10^{-8} \text{ A/cm}^2$ or less". However, it is preferable for an interlayer insulating film to have a high Young's modulus and a low leakage current. Consequently, it would be easy for a person skilled in the art to apply this feature.

Claims 4-7

The invention set forth in claims 4-7 involves an inventive step in relation to the documents cited in the international search report. Documents 1-4 do not disclose

the feature wherein a second insulating coating containing a compound having a borazine skeleton within the molecular structure is provided on a first insulating coating containing a siloxane resin.

Claims 8-12, 14 and 20

The invention set forth in claims 8-12, 14 and 20 involves an inventive step in relation to the documents cited in the international search report. Document 4 does not disclose the feature wherein "polymerisation is carried out in the presence of a solid catalyst" or the feature wherein "particulate scavengers that adhere metal components derived from a metal catalyst are added to a polymer system that has been subjected to the aforementioned first process."

Claims 13 and 16-19

The invention set forth in claims 13 and 16-19 does not involve an inventive step in the light of document 1 cited in the international search report. Document 1 does not specifically indicate that "the solid concentration is 0.5% by mass or greater". However, the numerical range of a "solid concentration of 0.5% by mass or greater" in a composition that is used as a coating liquid for forming an insulating film is one commonly used. Consequently, it would be easy for a person skilled in the art to conceive of applying this feature.

Claim 15

The invention set forth in claim 15 involves an inventive step in relation to the documents cited in the international search report. Document 1 does not disclose a polymer having repetitive units represented by formula (2). Moreover, document 4 does not disclose a composition wherein "the content of metal impurities is 30ppm or
